MC-100

Surface Whitener

Description: MC-100 is a spray-on or brush on compound which removes rust film due to road deicing agents. MC-100 is not an acid. MC-100 is a white powder with a strong sulfur smell in the presence of moisture.

Application: MC-100 should be diluted in water 1 part MC-100 to 10 parts water. It can then be injected through a power washer or applied using a brush after surface has been cleaned with a detergent such as MC-200 or MC-Thunder. Insure there is proper ventilation and fresh air when applying this product.
