BENEFITS

- Seamless 2-step washing and rinsing without letting go of the wand or stopping to change any switches or valves.
- No bulky 2-step hoses.
- No remotes – no line of sight or frequency signal needed.
- No chemicals run through your pressure washer pump – extends the life of your pumps.
- No chemical valves to fix or replace & no chemical bleeding during rinse.
- Low maintenance.
- Increased efficiency & productivity.
- Decreased chemical & water consumption.
- Saves money.

If you're ready to increase your efficiency with the Advanced Trigger Activated Control (ATAC) System, contact us today!

BASIC FUNCTION

- Attach system to pressure washer and to chemical hoses.
 - Chemical #1 to left injector.
 - Chemical #2 to right injector.
 - Wand to quick coupler socket.
 - Power cord to battery.
- Power system on.
- Select mode and begin washing.
2-step mode:
 - 1st trigger squeeze initiates rinse until released.
 - 2nd trigger squeeze initiates chemical #1 until released.
 - 3rd trigger squeeze initiates chemical #2 until released.
 - 4th trigger squeeze initiates rinse until released.
- Remain on same step with delayed trigger squeeze.
- System resets to rinse mode with 5 minutes of inactivity.
- Simply power off when complete.
